ORDER

Appellant filed a notice of appeal with the circuit court along with over 70 pages of documents attached. Appellant filed a certificate of redaction with the circuit corut, indicating that he had complied with the redaction requirements of Rule 84.015. However, the documents attached to the notice of appeal include information that should be redacted, but that Appellant has not redacted.

This Court orders the attached filings to the notice of appeal be placed at a security level of 3 to prevent public access to the documents. Appellant is cautioned that in the future he must comply with the redaction rules; not simply file a certification that he has complied. Failure to comply with redaction rules may result in the dismissal of his appeal or other sanction.
