Executive Summary: OSCA 14-042

COMMUNITY TREATMENT, INC COMPREHENSIVE COMMUNITY HEALTH CENTER (COMTREA)

In 1972 mental health care in Jefferson County did not, for all practical purposes, exist. Then a group of dedicated citizens created Community Treatment, Inc. (COMTREA). The doors opened in the spring of 1974. The agency has continued to grow ever since, responding to the needs of the residents and leaders of Jefferson County, Missouri.

Most recently, in October of 2012, COMTREA was awarded the designation of a Federally Qualified Health Center. This allows our providers to work together from a multidisciplinary team approach to provide comprehensive treatment services for all our participants and most importantly the treatment court participants. COMTREA remains committed to its mission ***to be an innovative, effective, and responsive community comprehensive health center for Jefferson County.*** We are committed to assisting our county residents in securing adequate mental health, substance abuse, dental and primary care services.

We reassert that emotional and social problems, substance abuse, chronic health care conditions, domestic violence and mental health illnesses are major concerns of today. We believe that COMTREA must take a leadership role in addressing these issues for the health and welfare of all citizens in our county. We also continue to believe that COMTREA must address issues of concern through direct patient care, prevention and educational efforts, legislative initiatives, and continued staff training in the most up to date/best practice methodologies for their respective disciplines.

COMTREA exists to serve those in need; we believe that our participants are entitled to the best professional care, in the most comfortable surroundings, at the most reasonable price possible. This we pledge to do.

COMTREA, in Jefferson county, is duly certified by the Missouri Department of Mental Health and the Division of Behavioral Health Services, as an approved CSTAR Substance abuse treatment provider. All staff that provides services within the program for the treatment courts are fully qualified, certified through the Missouri Substance Abuse Professional Credentialing Board or licensed through the state of Missouri (either Licensed Professional Counselor or Licensed Clinical Social Worker).

Each staff is privileged for all clinical services provided to all participants on a bi annual basis. Initially, upon offer of job; through all pertinent data bases full background screenings are done as well. Transcripts, e-verify for license and certifications are done as well with every privileging application. Supervisors approve the requested set of privileges

and they are then presented to the full committee. Upon review and approval, provision of service can begin.

Treatment staff is full participants with the court team and fully staff cases weekly (from court progress reports) as well as full participation with court day as well.

Our treatment services are based in evidence based practices such as Motivational Interviewing, Cognitive Behavioral Therapy; Moral Reconciliation Therapy plus other curriculum based interventions such as Integrated Dual Disorders, SAMHSA treatment programs and the MATRIX.

The treatment court participants are all enrolled in either Department of Mental Health CSTAR programming, SROP funding prior to enrollment for use of OSCA funds. The court is the payor of last resort. We do not utilize third party insurance coverage for our participants currently.

Program Services

COMTREA, as the treatment provider addresses:

Comprehensive Substance Abuse Treatment and Rehabilitation (CSTAR)

- ❖ -Level 1 Day Treatment *(25 hours per week of individual therapy, group process, group education; support and advocacy).
- ❖ -Progression Through the Levels as indicated from court team and RANT evaluation.
- ❖ -Communicable Diseases Risk Assessment, Education, Testing & Counseling: in conjunction with the Jefferson County Health Department and our primary care services.
- ❖ -Reassessment ongoing to address clinical levels of care
- ❖ -Treatment Plans and Treatment Plan Reviews
- ❖ -Treatment Team staffing weekly, with full team.
- ❖ -Stages of Change, addressed in individual and group
- ❖ -Community Support Services
- ❖ -Psychiatric Evaluation and Medication Follow Up –
- ❖ -Medication Assisted Treatment
- ❖ -Co-occurring Disorder Services
- ❖ -Trauma Focused interventions/services
- ❖ -Routine Drug Testing as provided via **Avertest Labs**
- ❖ -Referral and Case Coordination
- ❖ Family Therapy
- ❖ Education for Participants and Families
- ❖ -Relapse and Recovery Planning
- ❖ -Alumni group
- ❖ -Collaborative Discharge/Graduation Planning

Treatment services are provided using evidence based practices methodology and under a clinical supervision protocol. When working with participants, the following are key results areas that are addressed regularly within group and individual therapy as well as group education.

Key Results areas within all treatment activities:

- **Substance Use education:** Present factual information about drug effects; expand awareness of the behavioral, social, medical and psychological consequences of substance abuse; challenge and replace/correct the distorted beliefs about substance use and abuse and family/community consequences..
- **Impact of Substance Abuse on Families and Social/Community Relationships:** Understand the effects of substance abuse on the family; learn resources available for the recovery process of family members.
- **Motivation and Stages of Change:** Understand stages of change theory; help participants reframe the impact of substance abuse on their lives; develop an internal need for behavioral change.
- **Decision Making and Understanding Criminal Thinking Errors:** Learn how thoughts and emotions contribute to behavior; learn that thoughts and emotions can be controlled; identify thoughts, emotions and behaviors related to consequences.
- **Life Management and Goal Setting:** Review significant events in life since birth; prioritize aspects of life; discuss and set life goals; examine conflict between goals and past behaviors; managing life; managing money.
- **Anger Management and Coping Skills:** Educate about anger and interpersonal relationships; develop self-control skills to manage overwhelming emotions; teach specific anger management techniques such as time-outs and conflict resolution; teach functional family relationships.
- **Stress Management:** Participants will learn about stress management techniques that can be helpful in recovery such as relaxation training, exercise, nutrition and spiritual development.
- **What is Recovery and Recovery planning?:** Learn recovery skills; learn basic tools of recovery; understand triggers and cravings; learn techniques for stopping thoughts that can lead to substance abuse.
- **Relapse Prevention Planning for Substance Abuse and Criminal Thinking:** Addresses the following topics: is alcohol use/drug use ok for me?; avoiding idle time; understanding relapse drift; effect of triggers and symptoms and how to manage coping skills
- **Health Care for the total person:** care coordination and referrals with primary care as needed for each participant.
- **Co Occurring Disorder/Trauma treatment:** education and intervention for those participants experiencing co occurring disorders-addressing mental health, substance abuse and chronic care conditions as well as trauma in their lives. This service is offered for both individual therapy and group therapy.

- **Medication Assisted Treatment:** offered in our outpatient clinic locations. Evaluation and follow up care provided.

Additional goals/materials for treatment:

- Decreasing crises
- Learning effective communication skills
- Employment goals; educational/vocational goals: returning or continuing work or school
- Physical/dental and medical care goals: understanding the impact of substance use on health and access to health care
- Housing goals: creating stable, secure, safe housing and living environment.

**Currently, COMTREA does not provide virtual counseling to treatment court participants.*

COMTREA Drug Treatment courts utilize AVERTEST Labs for all urine drug screens and other testing for all participants.

COMTREA's Comprehensive Substance Abuse Treatment and Rehabilitation program, (CSTAR), within the treatment courts, are designed to offer stage matched interventions and support to participants in all phases of recovery and to address participant needs holistically.

Each participant will have a comprehensive assessment, completed by a licensed clinician, to denote demographics, reason for referral and enrollment, establish full, multi axial diagnoses, determine the most appropriate level of care, and determine the need for referral to other services. The assessment interview typically takes one hour to complete and involves obtaining the following participant information: a detailed substance use/abuse history; history of any previous substance abuse treatment; any legal concerns; a detailed family and social history; history of any mental health concerns or treatment; housing situation, family situation and concerns, health history and concerns, any identified obstacles to treatment; and the need for any referrals or other services to address holistic healthcare.

Assessment Update also within the Assessment Process.

In the event a treatment court participant has received the assessment from any program operated by the agency within the past six (6) months, we will administer an assessment update upon admission. This service consists of an update of the assessment, diagnostics and an evaluation to develop level of care recommendations and treatment recommendations.

Treatment Planning

The Behavioral Health Treatment Plan will be completed at the end of the substance abuse assessment and in collaboration with each participant and the full court team. This plan

will outline the participant's preliminary goals and concerns and will serve as a reference when the formal treatment plan is developed. The plan's components include demographic information, the participant's presenting problem and goals, an action plan, SNAP information (Strengths, Needs, Abilities, and Preferences), and diagnostic and clinical impressions/recommendations. The plan is signed by the participant and the full court team. The updated treatment plan is completed within 72 hours for a participant enrolled in Level 1 Treatment, and within the first three therapy sessions for participants enrolled in other level of care as determined by CSTAR assessment and RANT * level recommendations.

The RANT is also completed by the probation officer within this district and within the court team. Those results are shared with the team and used for level of care, treatment planning and service coordination.

For those participants enrolled in Level I, Day Treatment,: Level 1 Day Treatment is a structured, intensive, short-term outpatient program with services offered on a daily basis. Participants eligible for Level 1 Day Treatment cannot achieve abstinence without close monitoring, structured activities, and frequent support. Participants in Level 1 Day Treatment will participate in at least 25 hours of services per week, including at least 1 hour of individual counseling each week. COMTREA's Day Treatment program meets M-F from 9:00am- 2:30pm. Level 1 Day Treatment is located in COMTREA's Festus location. Lunch and transportation are offered daily for all participants in Level I services.

Stages of Change

The Stages of Change model examines a participant's readiness to change and provides a framework in which to assess this throughout the various stages of treatment. COMTREA uses the *Substance Abuse Treatment Scale* or *SATS-R* to document and track a participant's Stage of Change during weekly staff meetings. The *SATS-R* includes the following eight stages:

- Pre-engagement
- Engagement
- Early Persuasion
- Late Persuasion
- Early Active Treatment
- Late Active Treatment
- Relapse Prevention
- In Remission or Recovery

Reviewing and documenting stage of change ensures clinically appropriate interventions are being used with individual participants based on their strengths, needs, abilities, and preferences as well as their court requirements.

Individual, Group, and Family Therapy

All treatment court participants receive group and individual therapy (which include individual psychotherapy, group process and individual and group educational supports) sessions as appropriate for their level of care and individual needs. Clinicians will assess the needs of family members, when available, and will refer participants for family therapy if indicated and requested. We can provide family interventions, therapy, education and referral/advocacy services. Family members are also referred to self-help groups, family education groups, and 12-step meetings as necessary. Families are encouraged to be involved in the participant's treatment unless contraindicated in the treatment plan.

Some co-occurring topics covered in the CSTAR groups are: the connection between substance use and mental health, substance abuse and chronic care conditions, substance abuse and depression, substance abuse and anxiety, substance abuse and bipolar disorder, substance abuse and schizophrenia or schizoaffective disorders, and the relationship between substance abuse and trauma. We also address the connection between substance abuse and resultant or complicated chronic health care conditions.

Community Support services shall also be provided to each participant enrolled in a treatment court program and or CSTAR program within treatment court program. Community support consists of educational, supportive, advocacy, health and wellness, nutrition, housing supports, relapse prevention, recovery planning, symptom management and coping skills specific activities conducted with or on behalf of a person in accordance with an individualized treatment plan. Services are provided to maximize an individual's immediate and continued community functioning while achieving and sustaining recovery/resiliency from mental illness and/or substance use disorders. These services are delivered in an amount and scope defined by each individual's plan, and not all individual plans will contain all t the same level of services

Within the DWI Treatment Court, the SROP program is a treatment program developed to provide long term substance abuse treatment to participants who have felony Driving While Intoxicated or Driving Under the Influence offenses and are considered to be at a higher risk for re-offending. The Serious and Repeat Offender Program (previously Level IV SATOP) is an outpatient program consisting of at least 75 hours of treatment in no less than 90 days. Services must include a minimum of 35 hours of individual and/or group counseling. DWI Treatment Court participants may also be enrolled in SROP concurrently.

Within the treatment record, EMR, all documentation is to be completed within 72 hours of service delivery.

- Type of service; location of service; length of service
- Date;
- Beginning and ending time, in real time;
- Synopsis of the service; participant response, clinical interventions used and plan of action.
- Signature and credentials of service provider.

Weekly court reports contain the following as appropriate:

- Attendance of the participant at treatment appointments;
- Compliance (to include level of participation and completion of assignments, etc);
- Progress (is participant moving forward in achieving treatment plan goals and objectives);
- Recommendations by the treatment provider concerning: (a) current treatment services and any modifications needed (if the participant is doing well and making progress in treatment), (b) concerns (if the participant is not progressing), suggested improvements or sanctions if warranted, and (c) additional direction (recommendations for other services or action);
- A summary of material covered in treatment in order for the judge to ask the participant open-ended questions about their treatment and progress; and
- Drug test results.
- Missed appointments;
- Positive urinalysis;
- Changes in the participant’s treatment plan;
- Need for additional services;
- Changes in the participant’s family and/or living situation, such as major illness or injury, death, pregnancy, or other;
- Incidents involving participants where threats, assaults or possible crimes may have occurred.
