APPENDIX A - WORKLOAD ANALYSIS	11
ARRENDIV R. OLOGARY	4.0

#### STAFF AND RESPONSIBILITIES

The Technology Services unit of the 13th Circuit is staffed by 3 people:

#### Christopher Fishman-Weaver, Supervisor

- Staff Supervision
- Technical Project Management
- Hardware, Software and Network Management
- Applications Development Management
- Technology Bid & Contract Preparation and Review
- Statewide & Local Committee Participation

#### Jenniffer Macharia, Programmer Analyst

- Hardware, Software and Network Management
- Help Desk & End-User Support Tier 2
- Digital Sign Development

#### **Betty Mwai, Computer Information Specialist**

- Hardware, Software and Network Management
- Help Desk & End-User Support

#### Staff Changes in 2022

- Dickson Njoroge left his role as our Programmer Analyst. We thank him for his service to the courts.
- Jenniffer Macharia was promoted to Programmer Analyst.
- Betty Mwai was hired as the new Computer Information Specialist.

## Technology Services 2022 Annual Report

#### **TECHNOLOGY AREAS SUPPORTED**

Summary of the technology-related areas managed and activities routinely performed by the unit

#### Network

#### **Network Management**

- User and computer network account management
- Manage patch panels, cables and switches
- Collaborate with other technology staff to resolve network-related issues

#### Workstations

- Install and configure operating system and applications
- Locate and eradicate viruses and other mal-ware
- Manage workstations and resolve user issues both remotely and locally

#### Servers & Storage Devices

- Install and configure operating system and applications
- Manage storage devices (servers and Network Attached Storage)

#### **Printers & Multi-Function Devices**

- Configure network printers and multi-function devices
- Program printers for scanning and email
- Perform minor printer repairs and routine maintenance
- Manage printer maintenance vendors

#### Video Conferencing Technologies

- Support, Webex, video conferencing platform
- Configure video conferencing devices

#### Audio/Visual

#### Courtroom Technology

- Train and assist staff on courtroom evidence presentation systems
- Manage vendors troubleshooting and resolving issues

#### Audio/Video

- Manage audio technology (microphones, speakers, amplifiers & XLR cabling)
- Set up and manage projectors and document cameras
- iPads dedicated to Webex

#### **Digital Docket signs**

Manage digital docket signs

#### **Telephones**

#### **Telephones**

- Manage portable conference phones
- Collaborate with phone company regarding programming changes and issue resolution
- Route internal phone lines via patch panels

#### **General Support**

#### Support

- Manage Help Desk requests
- Collaborate with local and state government technical entities

#### **Technology Training**

- Train users in use of video conferencing and courtroom evidence presentation
- Develop and manage technology-related training materials
- Provide self-help information via the Circuit 13 Technology Help wiki

#### Security

- Extract video recordings of incidents
- · Apply appropriate user access for applications and network files

#### Other

- Technology budget preparation and implementation
- Develop and update technical documentation
- Manage technical inventory

#### **Applications Management**

#### **Development**

- Development of digital signage for all dockets/courtrooms
- Work to support current custom software as needed

#### Reporting

- Create and manage ad-hoc reports using COGNOS
- Extract court case data to spreadsheets as needs are identified

#### **CONFIGURATION OVERVIEW**

The computer network utilized by the 13<sup>th</sup> Circuit is part of the larger Statewide Judicial Information Network (SJIN) managed by OSCA. The SJIN is the backbone that connects all trial and appellate courts in Missouri. From a computer networking perspective, Missouri's courts are a united enterprise and the 13<sup>th</sup> Circuit is part of that enterprise.

OSCA provides for the courts certain **hardware components** utilized by judiciary sites including file, print, and database servers, communication devices, and other myriad technical devices that allow components to work seamlessly. Over the years many services have consolidated into centralized judicial data centers located in different geographical locations within Missouri.

OSCA also provides and manages enterprise-wide **software products** including, but not limited to, court case management software, jury management software, email, office automation products, Case.Net and the judiciary's "Your Missouri Courts" website.

Technical components unique to the 13<sup>th</sup> Circuit are located within the Boone and Callaway county locations and managed by Technology Services staff. The unit develops and manages certain software applications in-house used solely by 13<sup>th</sup> Circuit staff. It also installs and manages "off-the-shelf" software not provided by OSCA such as local accounting and other office automation products.

Additionally, the courts network interacts with the networks of Boone County, Callaway County, the City of Columbia, and the Missouri state network. The result is a blended responsibility and cooperation among circuit, state and local government entities.

#### **ASSETS**

#### **Asset Tracking**

The Technology Services unit uses software to track and manage the various hardware and software assets of the circuit. Some assets are owned by Boone County, some by Callaway County, and others by the state. However, the Technology Services unit tracks and manages all of the court-related technology components regardless of ownership.

At the end of 2022 the unit tracked the following technical assets:

#### Hardware

Boone-owned: 690Callaway-owned: 190State-owned: 264

The majority of these hardware assets are workstations, monitors and printers.

#### Licensed Software Installed

Boone-owned: 67 licensesCallaway-owned: 4 licenses

#### Non-Licensed Software Installed

Boone workstations: 102Callaway workstations: 9State workstations: 216

#### **Workstations**

The 13<sup>th</sup> Circuit utilizes approximately:

- 185 workstations (99 provided by the state).
- 50 notebook computers (23 provided by the state).

#### **Printers**

The 13<sup>th</sup> Circuit utilizes approximately 113 network and local printers, 12 of which are provided by the state.

#### **Video Conferencing**

The 13<sup>th</sup> Circuit utilizes video conferencing equipment to help reduce overall costs for staff travel for meetings and prisoner transport. There are several mobile units in both courthouses, as well as units incorporated into the technology of the Ground Floor, 2 South, 3 West and Ceremonial courtrooms of the Boone County Courthouse. Additionally, 3 Cisco video mobile units were added to facilitate video in low tech courtrooms.

In 2021 The Boone and Callaway County Jails transitioned to managing their own video units due to the changeover to Webex as our main video platform. Special network configurations are no longer needed saving considerable time and expense.

#### **Conference Telephones**

Both Circuit Courts routinely see case participants who either do not speak English fluently or do not speak English at all. Each court sometimes uses telephonic interpreters to accommodate non-English speakers through Language Line™, whereby interpreters provide language interpreting services over a portable conference telephone placed in the courtroom.

#### **Courtroom Technology**

In Boone County the 2 South and Ground Floor courtrooms have both teleconferencing and video conferencing abilities. Additionally, the 3 West, Ground Floor and Ceremonial courtrooms in the Boone County Courthouse have technology components for evidence presentation as well as teleconferencing and video conferencing.

NOTE: These lists show major products in use and is not an exhaustive list of all software items.

#### **Enterprise Software Provided by State Entities**

These products are provided by OSCA, the Missouri State Highway Patrol and Missouri's Department of Social Services:

**Product Primary Use** Windows 10 Operating system Office automation Office 2019 JIS / Show-Me Courts Court case management Court case reporting

OSCA Reports COGNOS Ad-hoc reporting **JMS** Jury management

Email, calendaring, instant messaging, & applications **Lotus Notes** 

Court case viewing online Case.net

Mo. Automated Child Support System **MACSS** Mo. Uniform Law Enforcement System **MULES** 

eFiling Allows attorneys to file case documents electronically eBench Allows judges to electronically manage the court docket

#### Local Software Provided by Technology Services

**Product Primary Use CCTS** 

Modules for:

Budget

Case Scheduler **Court Services** 

**Technology Asset Tracker** Manage technology inventory

Training Repository Records training of staff under Court Admin authority Court Admin Personnel Records personnel info for staff under Court Admin authority

Attorney Conflict Calendar Reporting calendar conflicts for attorneys

**BIRS** Booking and Incident Reporting System for court marshal staff

Court Kevs Manages physical key distribution

Technology Help Wiki Technology-related self-help web site for circuit staff

#### **Other Third-Party Software**

**Product Primary Use** 

Case Catalyst Court reporter transcription

Quickbooks Boone Circuit Clerk's office accounting **Nutrikids** Track nutritional information at JJC

Dreamweaver Web site management Cookin' with Pillsbury Recipe management for JJC

Jail View Allows select court staff access to Boone County jail records

Justice Web View Allows select court staff to access City of Columbia municipal case data

wIntegrate Allows select Juvenile staff access to City of Columbia records

Courtroom sound recording **FTR** 

Allows select court clerks to manage and access digitally archived Papervision

documents

#### 2022 ACCOMPLISHMENTS

#### **Upgrade of 3W Courtroom**

After numerous delays due in most part to the COVID-1 Pandemic, all technology in the 3 West courtroom has been upgraded. The upgrades focused on ease of use and vastly improve microphones and sound for video conferencing.

#### State workstation replacements

To keep pace with technology, the state replaces its computers every four years. 2022 saw approximately 99 computers it provides to its 13<sup>th</sup> Circuit employees replaced.

Each county replaces a portion of its workstations each year on a 5-year rotating schedule as opposed to replacing all in the same year

#### **Hearing Room One FTR Upgrade**

To expand our courtroom capacity, it was decided to purchase and deploy a new FTR

recording computer as well as microphones and other needed equipment to facilitate recording in Hearing Room One.

## Another year marked by technology delays

While there were several major upgrades, 2022 was a year again marked by delays in technology upgrades. We anticipate a big year of projects in 2023.

.

#### 2023 UPCOMING ACTIVITIES

#### **Phone System Upgrade**

While this project has been ongoing since 2022 we anticipate that we will be able to move forward on upgrading our current phone system by the end of the year 2023. This new timeline is dependent on the Boone County IT team, and other outside vendors. Once implemented County IT will help train Court IT on the use and management of the system. Going forward Court IT will have much more control of the phone system which will improve the user experience.

## Upgrade 2 South Technology Courtroom

After many delays due to the COVID Pandemic we anticipate upgrading the 2 South technology courtroom. Courtroom 2 South was last upgraded in 2013. Due to a failure of the current video conferencing equipment it was decided to upgrade this courtroom as well.

#### Firewall upgrade

To keep pace with current security standards we will replace the on site firewall in coordination with OSCA. These switches will be replaced after hours on a rolling basis to minimize disruption to courthouse operations.

## Ceremonial Courtroom and Jury Assembly Technology Upgrades

In 2023 we anticipate the upgrade of the technology in the Jury Assembly room. This

technology facilitates presentations to prospective jurors. All A.V. equipment will be replaced. We also anticipate upgrading all courtroom technology in the Ceremonial courtroom. Much like the 3 West courtroom done last year our goal will be to simplify the process for sharing evidence and improving sound quality across the board.

#### Wireless Access point upgrades

We anticipate upgrading all wireless access points in 2023. This includes 3 access points in the Callaway Courthouse and 12 access points in the Boone County Courthouse, Juvenile Justice Center, and Treatment Court Building.

## Transition to new Callaway Justice Center

While the building of the Callaway County Justice Center struggled with many delays, we anticipate moving into the new space at the beginning of the new year. This will be a multi day process which will include cutting over the network, moving network switches, and all user equipment. We will be working with an outside vendor to install all new upgraded courtroom technology in four courtrooms. This will include integrated video conferencing, and digital evidence presentation. This will be a significant upgrade from the current courtrooms that have no built in technology.

#### **APPENDIX A - Workload Analysis**

#### **Categories of Issues**

In order to manage workload, several categories of issues have been identified and established in JIRA™, the issue management software utilized by the Technology Services team. As each issue is recorded it is assigned to one of the following categories:

- 1. Staff & Equipment Tasks typically related to:
  - a) personnel changes (e.g. new hires and resignations), and
  - b) equipment moves or troubleshooting for computers & phones, etc.
- 2. Software & Device Configuration Requests to install software, configure printers, etc.
- 3. **Documentation** Updating technical documentation such as operational checklists.
- 4. **Software Development** Requests to change software functionality or fix software bugs.
- 5. Security Requests to modify user network/application security & to extract security video.
- 6. Purchases Requests to purchase technology-related equipment such as workstations.
- 7. Web Site Requests to modify web site content.
- 8. **Vendor Management** Contacting and managing outside vendor/OSCA staff or technicians.
- 9. Reporting & Data Research Requests for ad-hoc data queries and reports.
- 10. Training & Demonstrations In-service training on technology-related topics.
- 11. Wiring Pull network & telephone cable, or reroute telephone lines via patch panels.
- 12. **Administration** Committee participation, bid activities, other administrative tasks.
- 13. **Miscellaneous** Items that don't readily fit into any other category.

#### **Documentation of Issues**

The primary reasons for recording issues in JIRA are to ensure that nothing is overlooked and that priority issues are handled in a timely manner.

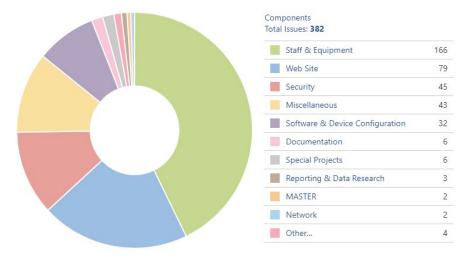

Issues must be documented in JIRA if they:

- a) cannot be immediately resolved.
- b) are scheduled to be worked at a later date, or
- c) are mandated by the judiciary's Security Guidelines.

It is important the reader note <u>not all issues are recorded in JIRA</u>. Technology Services staff routinely receive calls for courtroom assistance, password resets and other issues which are immediately resolved. Such issues are typically NOT recorded in JIRA after-the-fact. Therefore, the numbers noted in the chart on the next page are not an accurate reflection of the *total activities* performed by the Technology Services staff.

Clock time spent on issues is not recorded. Some issues documented in JIRA may be resolved in as little as 1 minute while others can take much longer. Therefore the numbers in the chart on the next page are simply *counts* of issues and do not reflect the total amount of time spent on recorded issues.

#### 2022 Issues Opened

On January 1, 2022, a total of 21 issues were pending

Throughout 2022 a total of 382 issues were opened and categorized as follows:

**43**% were related to **Staff & Equipment** which are typically activities associated with employee hires, resignations, and equipment moves.

**20%** were related to **Website Updates** which are typically job postings, news and meeting updates or other general website updates.

**11%** were related to **Security** which are typically related to requests to extract security camera footage or to modify application or network access.

**11%** were related to **Miscellaneous** which typically mean work not previously categized. This is not surprising given the changes made during the pandemic.

**8%** were related to **Software & Device configuration** which typically mean work not previously categized. This is not surprising given the changes made during the pandemic.

These five categories constitute 93% of the tasks recorded.

Throughout 2022 a total of 308 issues were <u>resolved</u>. Staff and equipment changes were the bulk of the issues this year.

#### **APPENDIX B - Glossary**

**CCTS** - The Technology Services staff develop and manage several applications locally - applications not provided by OSCA. Several of these are developed and managed as a suite of "modules" under the umbrella of a single user and system management module. That suite of modules is branded as *Circuit Court Technology Services*, or CCTS. Court staff utilize a web interface on the court intranet to access the various modules within the application. At the end of 2020 the modules in this application are: Focus on Kids, JJC Case Management, Court Services, Case Scheduler, and Court Budget.

FTR - For The Record ™ (FTR) is the software product used to make on-the-record sound recordings of certain cases at the associate circuit court level. The audio from at least 4 microphones (judge, witness, attorney A and attorney B) are routed to an FTR mixer. Audio is routed to the FTR computer workstation and managed using the specialized FTR software. Recordings are stored both on the local FTR workstation in the courtroom AND on a separate Network Attached Storage (NAS) device for redundancy.

**TRACKS** – In 2020 TRACKS replaced the previous learning system, the Judicial Education Web-Enabled Learning System (JEWELS) The Training Resources And Court Knowledge System (TRACKS) is a web-based training delivery system managed by OSCA on the courts intranet. TRACKS provides a host of training chiefly aimed at court staff regarding court case management, jury management, office automation products and other areas of interest to court employees.

**Licensed/Non-Licensed Software** – *Licensed software* refers to software that is purchased under a software licensing agreement. Examples include Case Catalyst used by the court reporters, FTR for sound recording, and QuickBooks utilized by the Boone Circuit Clerk's office. Such products can be installed on workstations only as defined in the end-user licensing agreements (EULAs). There is usually a cost associated with each workstation license. Licensed software is recorded as an asset in the Technology Asset Tracker software.

Non-Licensed Software products are provided free-of-charge to the 13th Circuit by a vendor or others. Examples include the MULES software provided by the Missouri State Highway Patrol, MACSS provided by Missouri Department of Social Services, and the AS/400 terminal emulation product provided by Boone County IT.

The license counts in this document do NOT include the Windows operating system nor do they include the Microsoft Office software as both are part of every computer workstation in the circuit.

**Multi-Function Devices** (MFPs) – A device that incorporates several functions into a single device, typically consisting of two or more of the following: printer, scanner, copier, FAX.

**OSCA** - The Office of State Courts Administrator (OSCA) is the central governmental entity that oversees state courts administration. As part of the organization's duties it carries out the mandates of the Missouri Court Automation (MCA) Committee. Missouri utilizes common applications for court case management and office administration. OSCA provides a number of key enterprise applications and infrastructure components.

**Polycom** - Video conferencing is the simultaneous exchange of video and audio communication among 2 or more participants. "Polycom" is a brand of video conferencing unit as are "Cisco" and "Tandberg". Polycom is the most commonly used brand of video conferencing unit within the 13<sup>th</sup> Circuit.

**Security Guidelines** – A set of guidelines intended to safeguard the integrity, confidentiality, and operation of the statewide judicial information network. The Security Guidelines are approved by the MCA committee. All judiciary employees, as well as volunteers, interns, etc. – anyone with a judicial network account – is required to comply with the guidelines.

#### 13th Judicial Circuit Court 2022 Annual Report

## **Technology Services**

**Show-Me Courts (SMC)** – The original court case management system, Judicial Information System (JIS), was developed in now-aging technologies. OSCA is rewriting JIS using leading technologies. The new system is branded as **Show-Me Courts**.

**Wireless Access Points (WAP)** – A wireless access point (WAP) is a radio transmitter/receiver that allows computers and other devices with wireless capability wirelessly connect to either the courts network or to the public internet. These devices are approximately 8 to 10 inches square and are mounted either high on a wall or ceiling in strategically-located positions to provide coverage.
