## OM500 GPS Tracking Device Specifications

The OM500 GPS tracking unit is both the transmitter and receiver of information in one unit. It is equipped with onboard processing capabilities and communicates with the host system via Verizon or the AT&T LTE networks. The unit allows customized tracking and reporting intervals to be assigned at the participant level and contains a non-volatile onboard memory for when the unit cannot communicate with the host system. The OM500 is equipped with three (3) location technologies (GPS, Wi-Fi, Cellular) to ensure that program participants are continually tracked, even in the absence of satellite signals. The OM500 is also able to store zones on board the device to provide immediate notifications on zone alerts. In addition, based on its performance capabilities, the OM500 does not require the use of a home unit or beacon to monitor participants 24/7. Through the use of a geographic Home Zone, the system ensures the participant's compliance with curfew or home detention restrictions.

**Make and Model** | Sentinel Offender Services, LLC, OM500

**Type** | One-piece GPS tracking device

**FCC Certified** | TS5-WP76-OM500

**Dimensions** | 3.9" x 2.6" x 1.5"; 5 oz without strap

**Battery Life** | 5+ days on a full charge on a standard rate plan; rechargeable Lithium-ion battery with an agency-definable threshold for low battery alerts for participants (e.g., 20% remaining) - the OM500 is configured to automatically vibrate, beep, and/or provide an audible voice reminder

**Charging Time** | 30 minutes per day via standard AC electrical outlet

**Storage** | 10 days; transmitted upon restoration of communications, in historical order with date and time stamp

**Waterproof Capabilities** | 1 atmosphere, or 33 feet; IP67 certified and IP68-compliant

**Tamper Detection** | fiberoptic strap design; device case; backplate

**Reporting Intervals** | Agency-defined for each participant; can be remotely programmed to a variety of different transmission rate plans, as intensive as tracking at one (1) point per minute and reporting the information every one (1) minute as well as a less intense plan that tracks one (1) point per minute and reports the information every ten (10) minutes. Other reporting intervals are also available based on agency preferences and can be established upon award during the negotiation process. It is important to note that regardless of the reporting interval setting, alerts such as Tamper and Exclusion Zone Violations are always reported immediately. It is also important to note that, when in an Exclusion Zone or while in Pursuit Mode, the OM500 devices increase their acquisition timers and collect location information every fifteen (15) seconds then report the data to the web-based information system every thirty (30) seconds.
